Cymulate: Proven Value **Across Industries**

Validate your Cyber Defenses Before an Attack

Each industry has its own unique concerns about cybersecurity, but the end goal is the same: reduce the likelihood and potential impact of successful attacks. While having the right cybersecurity policies and solutions in place is critical, it is just as important to verify that those controls are working as expected.

Organizations across all industries choose Cymulate for automated cybersecurity validation, proactively confirming that defenses are robust and reliable — before an attack occurs.

Customer Benefits

Validate Defenses Against Emergent Threats

Automate Continuous Security Testing

Optimize Defenses with Remediation Guidance

Healthcare
Cymulate enables us to test our defenses against the latest cyber threats as they emerge, prioritize remediation efforts and improve our security team's incident response skills.
- CISO, Healthcare Organization

Manufacturing
With Cymulate immediate threats intelligence, we're actually ahead of the curve and don't need to wait for authorities to provide us with intel about emerging threats.
- Shaun Curtis, Head of Cybersecurity, GUD Holdings

Energy
The Cymulate Hopper capability helps us understand where our gaps are and what we need to do to prevent a real attacker from moving laterally within our environment and reduce the 'blast radius.'
- Renaldo Jack, Group Cybersecurity Head, Globeleq

Banking & Financial Services
We didn't realize how many different use cases a security control validation platform could provide. Cymulate does so much more than we expected.
- Raphael Ferreira, Cybersecurity Manager, Banco PAN

Telecommunications
Cymulate is one of the easiest tools to test the overall security of your IT infrastructure. In our case with our endpoint security assessments, we have been able to detect a major breach in our security.
- Cybersecurity Engineer

Technology
With Cymulate, we can present quantifiable data to the board and show a direct correlation between investments and the reduction in risk.
- Avinash Dharmadhikari, CISO, Persistent Systems

Insurance
The best thing is that within 24 hours, Cymulate enabled us to check our security systems and report the results to our CEO.
- Haim Inger, CTO, Clal

Retail
[The] product has been great and easy to use. Cymulate support is always easily accessible and they are a main contributing factor to why the tool is so easy to use.
- Senior Security Analyst

Education
Provides up-to-date wide information of the risks that exist.
- System Administrator

Transportation
Great platform. A must-have in any organization. Friendly UI and UX and easy to use. Immediate value to the company, shows the gaps in seconds and mitigation options.
- Cybersecurity Practitioner

Consumer Goods
Cymulate has given us a very good way to regularly check all of our main security elements. Also, it seems they are constantly trying to improve their dashboard.
- Security Engineer
